

Promote your **green** credentials

Special Offer for first year – £95

Sustainable FM is the only dedicated magazine looking at environmental issues related to the facilities management market. It has a unique readership of over 14,000 throughout the public and private sector – all of whom have an interest in reducing their organisation's carbon footprint and increasing their corporate social responsibility profile.

To assist them we have launched the **Sustainable FM Online Directory**.

The **Sustainable FM Online Directory** is a fully searchable directory, allowing facilities, estates, energy, environment and purchasing managers to source all they need easily, whilst providing you with an excellent opportunity to promote your company to a £billion market.

Included in the directory is the opportunity to state your company's sustainable credentials (whether that be about your company itself or the products/services you offer).

In today's climate this will be the first section our readers will look to. The directory can be searched by company name, county, product category or brand name.

Sustainable FM magazine will promote the online directory in each issue. You will also benefit from passing traffic.

The **Sustainable FM Online Directory** is now live and can be viewed by visiting www.abbeypublishing.co.uk and clicking on the directory logo.

As an introductory offer the full package is available for a special price.

This includes:

- Full company details including live email/web addresses
- Contact details
- Product details
- Trade names/ISO Accreditations
- Logo
- Company environmental statement
